

WANYANGE GIRLS S.S

BIOLOGY DEPARTMENT -APRIL

S.3:

EXCRETION AND HOMEOSTASIS

1. Define the term excretion
2. Differentiate between the terms egestion and secretion
3. State 2 effects of waste products to living organisms
4. Name the methods by which unicellular organisms get rid of their waste products
5. Name two substances that are excreted by the contractile vacuole
6. State the Nitrogenous waste excreted by amoeba
7. Why is it possible for amoeba to excrete the above waste product?
