Qn. 3

- (a) Define term photo montage
(b) Explain the process of producing an article in photo montage

Answer

- (a) Photo montage is a special type of collage made from pieces of photographs or pictures
- (b)
- ✦ Prepare photographs, glue and a flat board as ground.
 - ✦ Choose a topic or a plan of your own composition such as warfare, disaster, party
 - ✦ Cut out different photographs in relation to the subject and choose the item of dominance
 - ✦ Assemble photographs by gluing them on the flat board in a good form of perspective towards the centre of interest
 - ✦ Get other photographs/small items to cover the gaps left in between, to create harmony and unity

Photo montage

Qn. 4

How can elements and principles of art and design be used in photo montage?

Answer

✦ **Size and Shape**

The size of work should be balanced in a way that reflects the shape and should be represented in an alternating manner.

✦ **Color and contrast**

Color is a strong element and the original plan should be given good values of color to create an interesting composition.

✦ **Space**

Space is also balanced in a way that makes a composition.

✦ **Rhythm and movement**

The repetition of element such as shape and line, will give a sense of movement throughout the composition.

✦ **Proportion**

A good relationship in terms of size and other elements (montage) a visually interesting presentation.

✦ **Emphasis/dominance**

A montage done with emphasis at a given element will draw the eye towards the subject matter (center of interest).

✦ **Variety**

A combination of one or more elements such as color and line, a good variation creates interest in the work/composition to avoid sameness.

A montage done under this technique of representing a bold compared to distant ones makes an interesting composition.

Good perspective also gives the viewer direction to the
