

Senior 1 ENTREPRENEURSHIP EDUCATION

HP-06

Issued by: **Tangwa Ronald**

Date: 27/05/020

Aspect: **FARMING & BUSINESS:**

Farming is a serious business in Uganda. At many times, farmers travel to Nambole stadium to learn new farming skills in what is called 'HARVEST MONEY EXPO'.

Take an example of Maize production. A maize crop is a seasonal commodity and cheaper to manage.

TASK

- i) Through sharing with friends, identify any five different seed varieties of maize grown in Uganda today.
 - ii) Identify the pests that affect a maize crop while still in the garden.
 - iii) Give the pesticides used to spray the maize crop against the pests indicated in (ii) above.
 - iv) Give some Agro-chemicals that you can use to kill the weeds in a maize farm without physical weeding with hoes?
- b) Give any four advantages of dealing in maize production.
