

WANYANGE GIRLS SECONDARY SCHOOL
MOSQUITO PROJECT WORK FOR S.2 & S.3 2020
BIOLOGY DEPARTMENT

13/04/2020

With support from your family members form a team of not less than three people, you being the team secretary. In this team you are to get a team leader.

- a) Each member should design and write down an **identity map** so that your team understands you much better. Design it basing on School/class, Gender, Nationality, Religion, Role in family(Father, mother, sister, cousin etc), Interests/hobbies, personality traits(shy, loud, talkative, quiet), physical traits(tall, short).
- b) First respond to the questions below as individuals then merge as a team share and develop a final family/team document.
 1. What do you know about Mosquitoes (Classification, their structure, , life cycle, feeding habits, economic importance)
 2. What are some of the problems caused by Mosquitoes?
 3. How can we ensure health for all (in our home, in our locality/village) from mosquito borne diseases

NB:

- a) ***As a team secretary, get a file and keep all records of every document/papers used.***
- b) ***Identity maps help us understand each other and learn to respect each other's strength and have them supported where they are not strong.***
