

SENIOR FIVE: BIOLOGY ACTIVITY 19/06/2020

QUESTIONS ON NUTRITION

1. What is the difference between an absorption spectrum and an action spectrum in the context of photosynthesis?
2. Outline three ways in which the structure of a green leaf facilitates photosynthesis.
3. List the principal functions of leaf veins.
4. What features do holozoic, saprotrophic and parasitic nutrition have in common?
How do they differ from each other?
